

Northstate

Simply better carpet.

Anti-static Computer Friendly

At Northstate Carpet Mills the carpet will not generate a static shock exceeding 3.0kV at relative humidity of 20% or more and a room temperature of 20° C following installation, provided that it is installed indoors.

Ability of carpet to dissipate electro-static charge thus reducing build-up of static electricity.

Gatewood XL has an anti-static component built into the fibre to combat increasing static build-up generated by growing trends toward computers and electronic equipment in our homes.

Please refer to our anti-shock warranty for more details.
